

MODELLE RÄUMLICHEN VERHALTENS „Models of spatial behavior“

Table of Contents:

Kapitel		Seite
1.	The "reductionist" explanation of social behavior	3
1.1.	The scientific approach of reductionist sociology	3
1.1.1	Reductionist versus emergentist explanatory strategy	3
1.1.2	The emphasis on the external appearance of social behaviors	6
1.1.3	The synthetic viewpoint as a goal of reductionism	8
1.2	General behavioral theorems	9
1.2.1	Terms and contexts for explaining individual behavior	9
1.2.2	Terms and contexts for explaining social behavior	14
1.2.3	Complex relations as a social system	20
1.3	Definition and measurement problems	21
2.	Passenger traffic in the Federal Republic of Germany: a behavioral theory of the choice of means of transport	23
2.1	Modal-split models for economic and political planning problems	24
2.2	The methodology of conventional modal-split models	24
2.3	Components of a behavioral theoretical decision model	25
2.3.1	Behavioral determinants (overview)	26
2.3.2	Decisive subjects	27
2.3.3	Subjective total costs	28
2.4	Operationalization of behavioral determinants	31
2.4.1	Financial burdens	31
2.4.2	Temporary burdens and reliefs	33
2.5	The traveler types	39
2.5.1	Business travelers	39
2.5.2	Holiday travelers	41
2.5.3	Visiting relatives	43
2.5.4	The frequency of the types	44
2.5.5	Distribution of travelers of a type to the means of transport	47
2.6	Test results of the submodel	50
3.	The distribution of spatial interactions as a parameter of regional development	55
3.1	Spatial interaction as a planning problem	55
3.2	Spatial centrality measures	56
3.3	Attractiveness and degree of centralization	57
3.4	The region as a social system	59
3.5	The standardized elective entropy (EEN) as a distribution parameter in systems	59
3.5.1	From Moreno's "psychographic cartography" to the use of EEN in spatial planning	59
3.5.2	The elective entropy and its standardization	61
3.6	Hypothesis formation on spatial distribution and regional transport cost development	64
3.6.1	Experimental arrangements and assumptions for the simulation of spatial distributions	64
3.6.2	Simulation results	68
4.	Summary of a methodical experiment	71
	Notes, Bibliography	73
	attachment	89
